Art Unit: 1618

Claims 1, 2 and 5-20 are presented for examination.

The remarks filed on December 12, 2006 have been received and entered.

Claims 1, 2 and 5-20 are rejected under 35 U.S.C. 103 (a) as being unpatentable over European patent Application for the reasons set forth on pages 2-4 of the office action of September 12, 2006.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant in his remarks argues that the European Patent Application does not disclose a stream or droplet velocity, but rather focuses on a "fine spray of electrically charged particles". The arguments are not well taken. The prior art of record teaches a spray for ophthalmic application with the drug volume sprayed at the claimed range. Applicant also alleges criticality to the "droplet size" and the "aqueous" formulation of the instant application in comparison to the prior art of record. As it was discussed previously, there is no evidence of record to demonstrate the advantages of the droplet size of the claimed invention over the prior art of record. Furthermore, the claims of the instant application are drawn to a "liquid" and not an aqueous formulation.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1618

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
